

PROVIDE ADVANCED RESUSCITATION

HLTAID001 Provide cardiopulmonary resuscitation
HLTAID007 Provide advanced resuscitation

COURSE DURATION OPTIONS:

- 1 day
- Half day – assessment only

St John Reference:

PAR

OVERVIEW

This course provides the skills and knowledge required to maintain life of an unconscious casualty until medical aid arrives. It also provides participants with the knowledge and practical skills to safely handle and use oxygen therapy equipment including cleaning, storage, set up and administration of oxygen on conscious breathing, unconscious breathing and unconscious non-breathing casualties.

Please note: it is an assessment requirement of this course that the participant be able to competently perform two minutes of continuous adult CPR on the floor.

COURSE CONTENT

- Infection control and legal considerations
- Management of unconscious, breathing and non-breathing casualties using the DRSABCD action plan
- Management of a choking casualty
- Chain of Survival
- Conducting primary and secondary assessment of the casualty

- Automated External Defibrillator (AED) safety
- Use of a bag valve mask
- Administration of oxygen
- Oxygen delivery systems
- Maintenance of oxygen and AEDs

COMPETENCIES

A Statement of Attainment is issued for successful completion of this course for the following unit:

HLTAID001 Provide cardiopulmonary resuscitation
HLTAID007 Provide advanced resuscitation

PRE-REQUISITES

St John recommends that people using advanced resuscitation techniques have completed HTAID003 Provide first aid. However, it is recognised that some employers require staff to be able to apply advanced resuscitation techniques without requiring this first aid competency.

Participants with a language or literacy difficulty or other special needs should inform the training support staff or trainers so appropriate assistance can be arranged.

PROVIDED TRAINING MATERIALS

- Personal protective equipment (for use in the course)
- St John “Basic Life Support” publication

ASSESSMENT

This course employs a variety of assessment methods in order to determine competency. These may include written short answer questions, multiple choice questions, practical scenarios, and practical demonstration.

CERTIFICATE RENEWAL

As per the *First Aid in the Workplace Code of Practice*, First Aiders should attend training on a regular basis to refresh their first aid knowledge and skills and confirm their competence to provide first aid. The Australian Resuscitation Council (ARC) www.resus.org.au recommends the CPR competency be recertified annually.

Please be familiar with any requirements in your own industry and/or organisation.
